

Ideal manual equipment for cleaning that is simple and easy to use.

Wet blasting equipment for cleaning

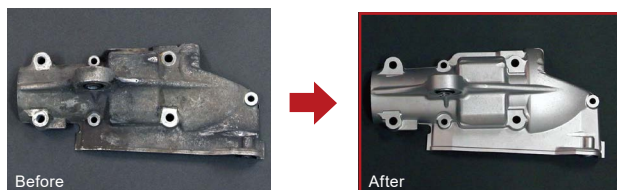

# MRB-7

## 1. Surprising quality

Wet blasting gives you a fine and uniform processed surface.

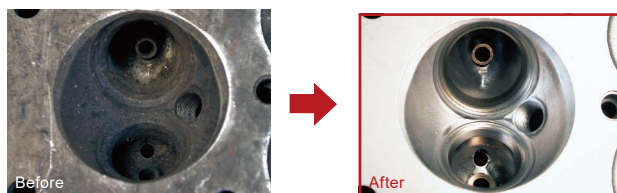

Cleaning with wet blasting can give you a beautiful, fine and uniform surface finish that cannot be achieved with dry blasting.

## 2. No pre-treatment

Able to clean thick grease, rust or carbon without pre-process.

We care about our environment, we care about you. It's solvent free.

## 3. Unique design

All stainless steel made body (except the cover)

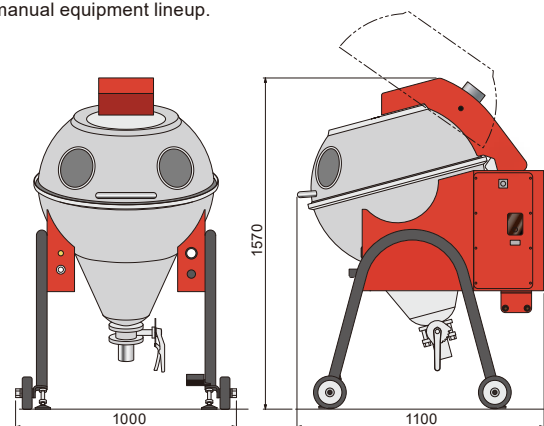

The beautiful and glossy surface of the wet blasting stainless steel cabinet and the original body design are combined in its compact design. It is available in three body colors: red, yellow, and blue.

MRB-7 is Macoho's entry-level model that is extremely simple to use and was created aiming for the most suitable shape and system for restoration and maintenance work.

Cleaning with MRB-7 gives you a much finer and uniform finish that is different from dry blasting. Also, since troublesome pretreatments such as degreasing are not needed, you can expect to reduce the number of work steps.

Contrary to its unique appearance, its robust structure and usability have been recognized, and currently well over 500 units have been delivered to customers. And it is the representative model of our manual equipment lineup.
